

# Topcon 3D-GPS+ Pays Off Fast for L&K

**Company:** L & K Construction & Development, Inc.

**Location:** Wylie, Texas

**Project:** The Shire

**Location:** Richardson, Texas

**Scope:** Site Prep for restaurant / office development  
25,000 cy earthwork

**Topcon Products:**

System Five 3D-GPS+/John Deere 850C dozer

**Contract time:** 24 days

"We previously used stakes and a robotic system and were surprised **when we finished this project 8 days early using the 3D system.** Eight days early, that's a 33% increase in productivity. And, because of the accuracy, I didn't receive any call backs for re-do work. I attribute 90% of the increase in productivity to being able to do mass and fine grade at one time. **It's paying off a lot faster than I expected."**

"GeoShack is always a phone call away, they solve any problem and any issue, period. If something can't be handled over the phone they come out within a few

**Kevin Nelson - Owner & President**

hours or the worst case the next day. They offer me great customer support and I really depend on that."

**Kevin Nelson w/ GeoShack's 3D-GPS specialist, Dave Bassett**

**L & K's John Deere 850C w/ Topcon's SystemFive 3D-GPS+ automatic machine control**

**Topcon Dealer:**

GeoShack  
2307 Springlake Road/Suite 514  
Dallas, Texas
