

# No downtime thanks to Topcon 3D-GPS+

*"...with the GLONASS capability, I've had no downtime due to lack of available satellites."*

Jonathan Copeland  
Project Manager  
Global Environmental, Inc.  
Chattanooga, TN

"We felt that Topcon has a superior product," states Jonathan Copeland, project manager of Global Environmental. Using Topcon's 3D-GPS+ machine control on his CAT D6-M dozer, and a HiPer+ grade management system on his latest job, Copeland has been highly impressed how Topcon equipment has increased his productivity. "The entire grading process from topo to grading to inspection has increased about 25%," he exclaims. "The GPS+ system," he continues, "has allowed us to keep working all day with zero downtime."

Using Topcon GPS+, Copeland is able to see what is going on at all times which gives Global Environmental greater control on the jobsite. "It's simple. Topcon has superior equipment and the best support."
