- PZL-1 mmGPS/LazerZone transmitter
- PZS-1 mmGPS/LazerZone sensor-rover
- PZS_MC mmGPS/LazerZone sensor-dozer

“We own mostly Caterpillar equipment and we went with Topcon because we have a history Topcon. I felt that they had a real good product and I like working with John Boyd (Boyd Instrument Co.)”

“We’re pleased. It has worked out real well for us so far. A lot of our work is tedious grading work – mostly fine grading – which is pretty labor intensive. The reason we purchased the equipment is to save on labor.”

Seravalli used Topcon’s mmGPS+ with their System 53D-GPS+ equipped Cat D6M for fine grading this running track.

Nick Brothman, Site Superintendent, checks grade on the concrete track perimeter curb using a Topcon HiPer+ with mmGPS+ and an FC-100.

Fran Seravalli – Owner

Joe Garlick, Survey Manager, likes mmGPS: “Now with Topcon’s mmGPS application we could stake this drain around this track. We can do things that need that accuracy.”
